PETITION UNDER 37 CFR 1.113 AND 37 CFR 1.181

Dear Sir:

Applicants hereby petition the Commissioner for Patents for relief from and reversal of a decision by the Office in an Advisory Action having a mail date of 06/02/2005, which denied Applicants' disqualification of U.S. Patent No. 6,618,727 by Wheeler et al as prior art under 35 U.S.C. 103(c).

A summary of the related facts is as follows:

- I. Applicants filed U.S. Patent Application No. 09/677,476 on 10/02/2000, which included the incorporation by reference of U.S. Patent Application No. 09/401,101. U.S. Patent

09/677,476

Application No. 09/401,101 subsequently issued as U.S. Patent No. 6,618,727 to Wheeler et al on September 9, 2003(the Wheeler patent).

2. In a first Office Action having a mail date of 04/09/2004, the Office rejected all claims 1-19 under 35 U.S.C 103(a) as being unpatentable over U.S. Patent No. 6,594,673 issued to Smith et al in view of U.S. Patent No. 6,618,727 issued to Wheeler et al.
3. Applicants responded to the first Office Action by amending claims 1-4, 8-11, 13-16 and 18-19, and adding claims 20-25 to further distinguish Applicants' claimed invention. Applicants also presented arguments to rebut the rejections by the Office, and stating in several instances that the Wheeler patent is incorporated by reference into Applicants' specification. The reasons that Applicants did not present an objection to disqualify the Wheeler patent as prior art at that time was that Applicants believed that the rebuttal arguments presented were more than sufficient to overcome the rejections by the Office, and to avoid the requirement for a terminal disclaimer for the application under consideration.
4. In a second and final Office Action, the Office Action having a mail date of 12/28/2004, the Office rejected all claims 1-25 under 35 U.S.C 103(a) as being unpatentable over U.S. Patent No. 6,594,673 issued to Smith et al in view of U.S. Patent No. 6,618,727 issued to Wheeler et al.
5. Applicants responded to the second and final Office Action by presenting arguments to rebut the rejections by the Office, and objecting to the use of the Wheeler patent under 35 U.S.C. 103(c), based on common ownership or subject to an obligation of assignment to the same entity, namely Infoglide Corporation, at the time of the invention of the application currently under consideration. Applicants repeated the statement above, that the Wheeler reference is incorporated by reference into Applicants' specification. Applicants also included a declaration of common ownership, verifiable by examination of the assignment records on the U.S. Patent

Office, a terminal disclaimer for the application under consideration, and a fee under 37 CFR 1.20(d).

6. Applicants filed a Notice of Appeal on March 28, 2005.
7. Applicants filed an Appeal Brief on May 31, 2005.
8. In an Advisory Action having a mail date of 06/02/2005, the Office treated Applicants' objection to the use of the Wheeler patent and disqualification as prior art under 35 U.S.C. 103(c) as an amendment, and refused entry as not timely submitted.

Applicants petition the Commissioner for Patents for relief from and reversal of a decision by the Office in an Advisory Action having a mail date of 06/02/2005, which denied Applicants' disqualification of U.S Patent No. 6,618,727 by Wheeler et al as prior art under 35 U.S.C. 103(c).

The reference of U.S. Patent No. 6,618,727 issued to Wheeler et al. (U.S. Patent Application No. 09/401,101), cited by the Office as a basis for all rejections, is incorporated by reference on page 2, line 25 of the specification of the current application as filed. The current application has a file date of October 2, 2000. Infoglide Corporation is presently the assignee of record of the present application and the Wheeler patent.

The current U.S. Patent Application No. 09/677,476 and U.S. Patent No. 6,618,727 (U.S. Patent Application No. 09/401,101) were, at the time the invention of U.S. Application No. 09/677,476 was made, owned by or subject to an obligation of assignment to the same entity, namely Infoglide Corporation of Austin, Texas. Assignment recordation documents for these applications are filed in the U.S. Patent Office.

Applicants also disclaim the terminal part of any patent granted on the instant application, which would extend beyond the expiration date of U.S. Patent No. 6,618,727.

09/677,476

Applicants included executed copies of a declaration of common ownership and a terminal disclaimer as Attachment A in Applicants' response to the final Office Action. A fee set forth under 37 CFR 1.20(d) was also included with that response.

Applicants request that the disqualification as prior art of the Wheeler patent under 35 U.S.C. 103(c) be entered because (a) new issues have not been raised that require further consideration and/or search, (b) no issue of new matter have been raised, (c) the entry of the disqualification is not an amendment, (d) the entry of the disqualification would place the application in condition for allowance, and (e) there is no such time constraint under 35 U.S.C. 103(c).

Respectfully Submitted,
